

Hope rises on the face of this mother who has just received medicine for her child during a medical mission outreach to Guatemala. What price would you pay to help your child feel better? Because Blessings provides all medicine at no cost to patients, there was great joy in the clinic this day!

In our last fiscal year, Blessings shipped 102 million courses of medicine and vitamins to medical teams, clinics and hospitals in 107 different nations around the world. We believe in the power of medicine and prayer to bring healing to the

hurting.
